

Mar Rodríguez

CFU

Climate Forecasting Unit

SPECS Project Manager

With plenty of experience in the public sector I have managed many European Projects. Even though my profile is scientific (PhD in physics, 1996, Univ. de Valencia) I have chosen this line of work because I consider this a daily challenge as any project is the same. I have to be very well informed of the latest changes in the regulations and policies of the EU as well as communicate those changes to all the parties and apply them to the management of every project.
