# EARTH SCIENCE SERVICES

SMOS Barcelona Expert Centre (BEC) synergies

Isadora Christel Jiménez  
*Services - Earth Science Department*

## OUR OBJECTIVE:

Facilitate technology transfer of state-of-the-art research from local, national to international levels in five areas:

Air quality assessments

Mineral Dust modelling

Weather forecasting

Climate predictions

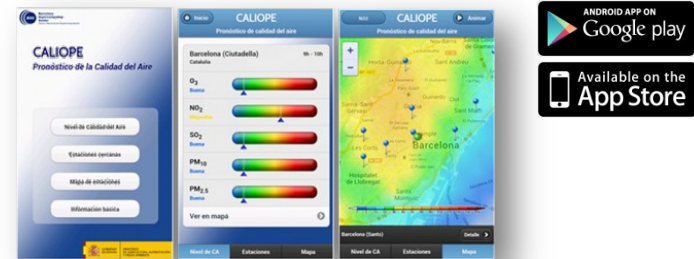

Computational Earth Services

## Air quality forecast system: CALIOPE

Provides air quality related information for the coming days and for the application of short term action plans for air quality managers.

Information is delivered using both online or custom applications:

## Air quality impact assessment

Air quality modelling provides comprehensive description of air quality problems by relating emission sources and atmospheric conditions

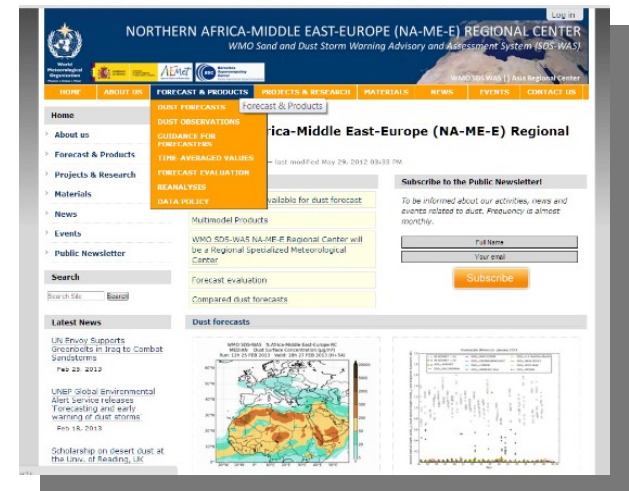

Left: NO<sub>2</sub> maximum h values in Barcelona (red >200 µg/m<sup>3</sup>)  
Right: Reductions due to fleet electrification (blue >25 µg/m<sup>3</sup>)

## Mineral dust forecasts SDS-WAS North Africa, Middle East and Europe Regional Center

Early warning system

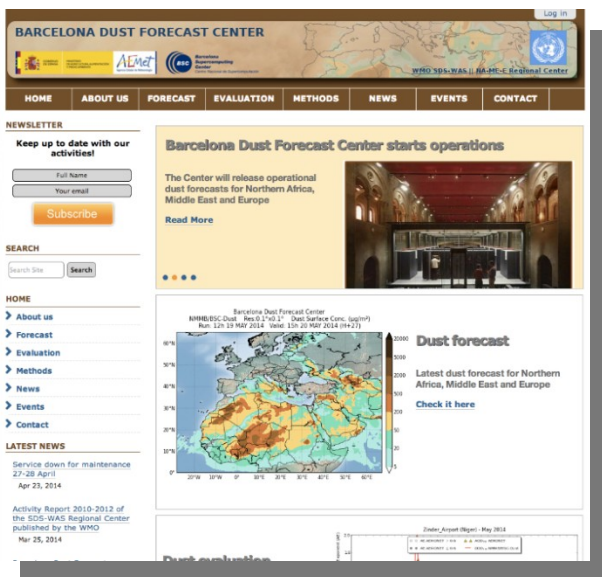

<http://sds-was.aemet.es> started in 2010

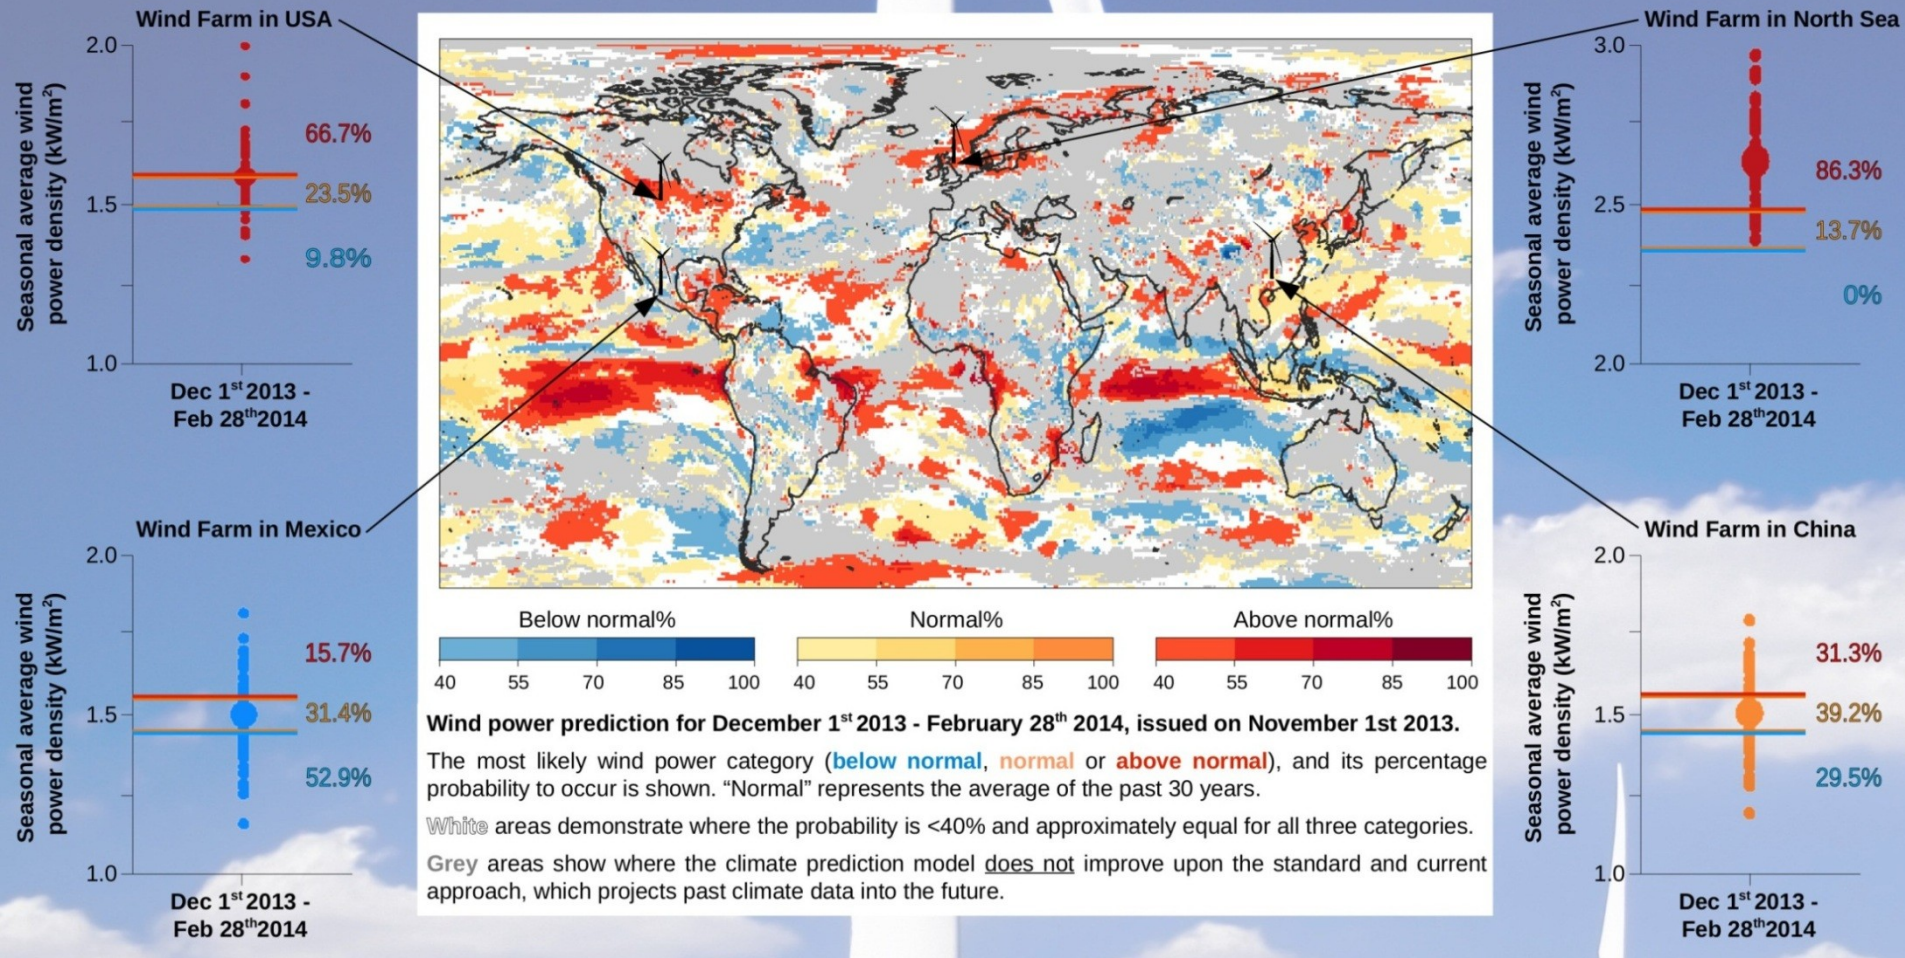

## Barcelona Dust Forecast Center

First specialized WMO Center for mineral dust prediction

<http://dust.aemet.es> started in 2014

## Illustrative examples of seasonal wind power predictions

EUPORIAS

## Products

- Performance analysis of Earth Sciences applications
- Development of HPC user-friendly software framework for Earth system modeling and the management of operational systems
- Provision of data services for Earth Sciences

## Applications

- Analyze Earth models codes to identify issues and propose improvements
- Port codes to power efficient architectures
- Develop, deploy and maintain software infrastructure for the management, dissemination, and analysis of model output and observational data
